

International Logic Systems

Capability Statement

International Logic Systems, Inc. (ILS) provides technology services, staff augmentation, consulting, and business solutions to government and private organizations. Our strategy of delivering expert solutions and utilizing a highly-skilled team can improve processes and performance for organizations.

Major Clients

What makes ILS the premier choice?

- ILS has been assessed and rated at Capability Maturity Model Integration (CMMI) Maturity Level 3 for Services and Development, and since 2012 has followed these appraised processes.
- ILS retains a successful track record and high retention rate with multiple clients for more than 25 years.
- ILS has maintained a low staff turnover since our establishment in 1993.
- ILS is a certified SBA 8(a) program graduate with sustained growth.

We Specialize In...

IT Modernization

Our comprehensive technology services incorporate advanced and dependable solutions for businesses. Using our solid experience and expertise, we can help your organization become streamlined and cutting edge with current technological trends. Adopting a strong agile approach, we specialize in application development, Cloud Computing, database management, business intelligence, AI, mobile applications, Salesforce CRM, enterprise architecture and much more.

Data Accountability & Innovation

Our proven data governance strategies deliver strong oversight, ease of access, and effective security to satisfy your informational needs. Adopting a strong culture of data, we leverage the latest technologies to revolutionize data analysis, database management, and business analytics.

Staff Augmentation

Our consulting services concentrate on delivering integrated best practices and flexible solutions to help businesses grow and be highly competitive. From contract to permanent staffing, we will align ideal staff skills to accommodate your needs and ensure your business goals are met every time.
